STATEMENT OF THE SUBSTANCE OF INTERVIEW

Mail Stop AF  
Commissioner for Patents  
P.O. Box 1450  
Alexandria, VA 22313-1450

Madame:

Applicant thanks Examiner Campbell and Examiner Lucchesi for the helpful telephonic interview on November 13, 2008 with the undersigned and Attorney James Smith. During the interview, it was agreed that the Applicant's device distinguishes from the primary reference, Hagen, U.S. 5,354,273, in that Hagen's device senses temperature and pressure during the injection of a substance, while Applicant's device senses displacement of the skin prior to any injection. Applicant begins the injection process by sensing displacement of the skin, and then injects based on the displacement.

It was agreed that Claim 24 would be amended to incorporate the "prior to any injection" limitation presented in different terms in claim 27. Accordingly, Claim 24 now corresponds in scope to prior independent claim 30.

Applicant has thus, amended independent claim 24 to recite the same.

Respectfully submitted,

HAMILTON, BROOK, SMITH & REYNOLDS, P.C.
